

WCF-VESF / WCF-VESF-E

Vinylester injection anchors - for medium and heavy loads,
for use with non-cracked concrete, without styrene

ETA-15/0744

Description

Vinylester two component (1:10) injection anchor without styrene. Intended for both handymen working around the house and professionals for reliable, durable installations. Anchor used for setting of threaded rods into concrete substrates. Content: 300 ml / 410 ml. Working temperatures for hardened anchor: -40°C to +80°C

Substrate material

- Non-cracked concrete (option 7) C20/25 through C50/60;
- Reinforced and non-reinforced concrete;
- Dry and wet concrete and flooded holes (Cat 2);

Related rods

- Threaded rods M8-M24 made of galvanized steel grades: 5.8 8.8 10.9;
- Threaded rods M8-M24 made of stainless steel grades: A2-70, A4-70, A4-80;
- Threaded rods M8-M24 made of HCR steel: 1.4529, 1.4565;
- Galvanized, hot-dip galvanized or thermodiffusion galvanized bars;

Application temperatures

5°C ÷ 30°C

WCF-VESF-300
WCF-VESF-410

10°C ÷ 45°C

WCF-VESF-E-300
WCF-VESF-E-410

Features and advantages

| | |
|---|---|
| Wide range of applications | Fastening of structural elements (beams, pillars), fastening of non-structural elements (railings, handrails, barriers), fastening of façade structures and supporting elements (stairwells, shelving units), installation of acoustic barriers etc. calculation method based on TR 029 |
| Styrene-free | Does not release volatile styrene compounds, making it safe for people and suitable for indoor applications |
| Normal recipe and summer recipe | Can be used in various working conditions: WCF-VESF - for normal installation conditions +5°C to +30°C; WCF-VESF-E - for summer (tropical) installation conditions +10°C to +45°C; |
| No stress during installation | It allows for installation near the edges without risking cracking of the substrate |
| Quick and shrinkless hardening | Speeds up installation work |
| Long life | Valid for use within 12 months in normal storage conditions |
| Two mixers included in for 300 ml of content | Ability to reuse the resin after completing work. Place the mixer on an unused cartridge mouth for next use, then unscrew the dried mixer and install the new one - the anchor is now ready for further work |
| Durable and safe packaging | 300 ml of content packed in foil and a cartridge. Foil packaging prevents the resin from getting out during prolonged storage, while the plastic cartridge serves as an additional protection layer (store in upright position) |
| Content 410 ml - coaxial cartridge | Increased volume - 410 ml for larger work scopes, the coaxial cartridge allows for easier portioning and allows for use of every cm ³ of the product |
