

WSWL Self-drilling pan head screw, PH

Description

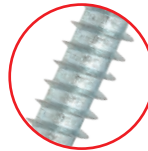

Type of installation	This screw does not require prior drilling.
Material	Zinc plated carbon steel
Product made to order.	

Features and advantages

Pan head with PH drive

Pan head ensures the correct tightness of the installed member. Commonly used PH drive makes installation easier.

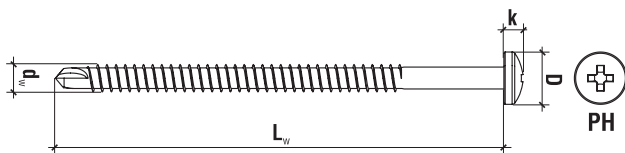

Correct thread pitch and length

The right pitch ensures correct installation of metal members.

Sharp self-drilling point

Special self-drilling point ensures easier and faster screw installation in steel.
