

WT Screw for deck board clips, TX

NEW!

**POLISH
PRODUCER**

Description

Application	Screws for hidden fixing of decking boards with the use of clips in tongue and groove joints
Substrate	Exotic wood, chipboard, plywood, wood, sterling board, MDF board
Material	A2 Stainless steel

Features and advantages

Counter-sunk head with TX drive

Countersunk head ensures flush fitting of the screw in the installed member. TX drive guarantees optimum torque transfer.

Cutting ribs and special shaped 6 mm head

Screw together with a suitable clip for tongue and groove joints make the decking safe and reliable for users.

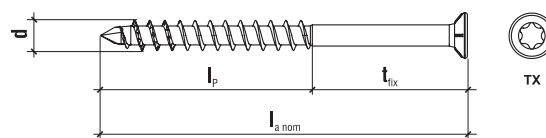

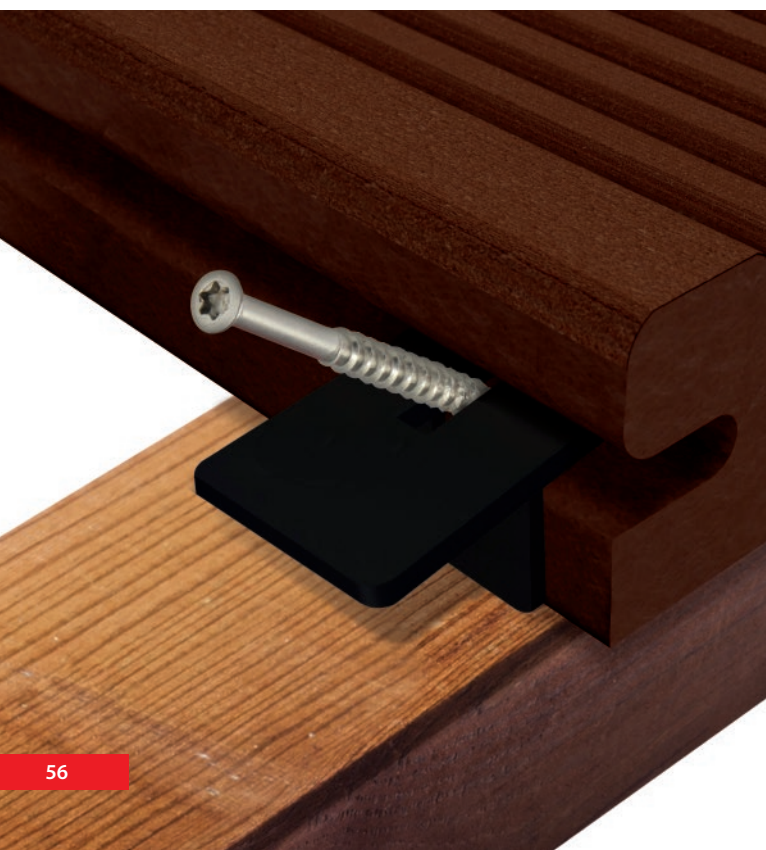

Serrated thread

Special cutting notches on the thread cut wood structural fibres while the screw is advancing.

Special cutting point

This special point makes for a quick start installation of the screw and prevents wood from splitting.

Screws recommended for decking clips - hidden fixing
