

KGD / KSGD Black phosphate screws

PN-EN 14566

PH

Description

Application	Universal screw for wooden substrates.
Type of installation	This screw does not require prior drilling.
Substrate	Chipboard, plywood, wood, sterling board, MDF board
Material	Phosphated low-carbon steel

Features and advantages

PH 2 drive

One of the commonest drives provides for installation with the use of impact torsion bits

Countersunk head

Countersunk head ensures flush fitting of the screw in the installed member.

Thread for timber and sharp point

Thread design guarantees reliable and durable fixing both to timber and wood-based products. Its sharp point makes for a quick start installation.
