

KMO-310

FIXING ADHESIVE PRO-FIX 100

TECHNICAL DATA

Code	Colour	Can size	Quantity per box
KMO-310	White	310 ml	12

APPLICATION:

Waterproof, fast curing neoprene-based adhesive with high bond strength and excellent adhesion to any type of building material except PP and PE. Replaces nails and screws.

Suitable for bonding battens, skirtings, wooden panels and other wood-based materials, cork, metal, glaze, rubber and polyurethane foam, for fixing switches, holders, PVC cable shields, etc.

MAS-310

MASTER SILICONE - NEUTRAL SEALANT
- WHITE, TRANSPARENT

TECHNICAL DATA

Code	Colour	Can size	Quantity per box
MAS-310-BB	Transparent	310 ml	12
MAS-310-BI	White	310 ml	12

APPLICATION:

Universal permanently elastic one-component neutral curing silicone adhesive and sealant which offers excellent adhesion to porous and non-porous substrates. Insensitive to damp conditions and resistant to mould and UV radiation as well as all weather conditions. Elastic sealing of different building and finishing materials including concrete, wood, metal, stone and PVC materials. Suitable for sealing windows, show-cases and glass cabinets. For use in finishing jobs in sanitary rooms and wash rooms, etc. Suitable for installation of sanitary ware including baths, wash basins and shower trays. Extremely useful in a variety of building and renovating jobs. For use in indoor and outdoor applications and in damp and dry rooms. Suitable for all kind of finishing jobs, insulating and sealing of roofs and facades as well as fitting of mirrors, sanitary ware, etc. Suitable for use on slightly basic, acidic and metal substrates. Does not cause discolouration or staining of marble or other natural stone surfaces. **Silicone sealant can also be used as an adhesive as it has excellent adhesion to glass, tiles, aluminium, most plastics, building materials and coated surfaces.**
