

PB Butyl strip

Description

Butyl Belt is a synthetic butyl sealant.

Application

- For sealing of perpendicular surfaces and technological contacts in mineral waterproofing systems
- As a sealant against water penetration, dust, moisture in compressed joints
- Sealing of layered boards
- Sealing of roofing materials eg. Sealing of roofing tiles
- Sealing of roofing joints, membranes
- Manufacture of roof accessories, ridge tapes, chimney belts
- Facade, roofing, winter gardens, windows, stained glass
- Sealing of car bodies, caravans, camper
- Sealing of tanks, silos
- Sealing of ventilation ducts, air conditioning, flue gas
- Others requiring non-hardening sealing compounds against air, water and moisture penetration

Features and advantages

- Plastic resin mixture
- Doesn't harden, doesn't crumble
- No volatile substances, no loss of mass
- Excellent waterproofing properties
- Good adhesion to many types of surface
- Good resistance to uv radiation
- Embossed in the form of a strap or cord for easy and precise operation
- Use with a small amount of waste
- Remains flexible throughout use temperature range from -40° c to +90° c
