

SNE-310

NEUTRAL SILICONE - WHITE, GRAY, TRANSPARENT

TECHNICAL DATA

Code	Colour	Can size	Quantity per box
SNE-310-BI	White	310 ml	12
SNE-310-SZ	Gray	310 ml	12
SNE-310-BB	Transparent	310 ml	12

APPLICATION:

Universal permanently elastic one-component neutral curing silicone sealant which offers excellent adhesion to porous and non-porous substrates and is suitable for a range of external and internal applications. Resistant to UV.

Elastic sealing of different building and finishing materials; sealing of window panes, shop- windows, glass cases and ventilation system connectors. Suitable for use on a variety of substrates including metal, stone, wall, brick, cement, wood, aluminium, glass as well as glazed or enameled surfaces, and also PVC. Do not use for sealing aquariums.

SSZ-310

SILICONE GLAZING SEALANT - WHITE

TECHNICAL DATA

Code	Colour	Can size	Quantity per box
SSZ-310-BB	White	310 ml	12

APPLICATION:

Universal permanently elastic one-component acetic curing silicone sealant which offers excellent adhesion to non-porous substrates. A wide variety of possible interior and exterior applications. Insensitive to UV radiation and changeable weather conditions.

Elastic sealing of different building and finishing materials. For use as a sealant for window frames and glass panels in steel frames (greenhouses). In sealing of shop-windows, show cases, glass cabinets and counters. Suitable for bonding various materials including wood, metal, enamel and stainless steel. Filling of crevices in areas with decorative elements, screens and glass blocks (bricks). Suitable for metal surfaces with anticorrosive protection. Do not use for sealing aquariums. Do not use for bonding glass or glazing in facade works. May cause staining when in contact with such natural stone as marble, granite or quartzite.
